Subject: RE: [REDACTED] and [REDACTED] visit to FSANZ [SEC=UNCLASSIFIED]

Hi [REDACTED] – this should be fine but are you able to specify an approximate date – I assume you are talking about visiting either before or after the IAPB conference? Also, are there people in particular you would like to have at this meeting in addition to people from our GM area – eg members of our executive for example? Just let me know and I will chase up what would be good dates for us.

Subject: [REDACTED] and [REDACTED] visit to FSANZ

[REDACTED]

I know you will be spending time with [REDACTED] in Melbourne at the IAPB Conference. However we would like to spend some time with a more broad group from FSANZ and [REDACTED] also thinks there may not be an opportunity to cover everything he would like to cover with you in Melbourne. I was hoping he could visit FSANZ to discuss the regulation of new breeding technologies around the world. Would these dates suit FSANZ staff? I am also hoping to visit OGTR so once I hear back from all of you about availability I will refine the date and time.

[REDACTED], as the [REDACTED] develops, assesses and coordinates global regulatory strategies for emerging and leading biotech crops developed through new and novel plant technologies including site-directed nucleases, RNAi and synthetic biology. Hence, he is very interested in understanding the regulatory environment for crops bred using these technologies.

[REDACTED] also chairs the [REDACTED] working group which produces documentation on precision breeding applications (aka New Breeding Techniques – NBTs) to provide guidance and information on such applications to governments and regulatory bodies worldwide. As chair of the CLI-NBT team, [REDACTED] has been an invited speaker to represent CLI's position and documentation for OECD, Government of Japan, United States Department of Agriculture-Foreign Agricultural Service, American Seed Trait Association and at various international conferences and meetings.
